PROFESSIONAL SUMMARY

AI & Data Science Engineer with hands-on experience building production-ready ML, NLP, and Generative AI systems. Proficient in RAG pipelines, LLM integration, vector search (FAISS), and full-stack Python development. Completed 7-month Infosys engineering program; delivered 2 end-to-end AI projects using LangChain, Hugging Face, and Streamlit. Eager to contribute scalable AI solutions at a growth-oriented organization.

EXPERIENCE

System Engineer Trainee — Infosys

Nov 2025 – May 2026

- Completed intensive 7-month full-stack training covering **Unix, Python, SQL, Flask, HTML/CSS, JavaScript**, and foundational Java & DBMS — equivalent to ~1,200 hours of structured engineering practice.
- Built and deployed **Box office**, a Flask web app serving dynamic movie database content to 50+ internal users, backed by a normalized relational database with 10+ SQL queries.
- Applied **MVC architecture, and Git version control** in hands-on project work, cutting page-load time by 30% through query optimization.

PROJECTS

AI Document Assistant — RAG System with Llama3 [\[GitHub\]](#)

- Engineered a **Retrieval-Augmented Generation (RAG)** pipeline using Llama3, LangChain, and FAISS; supports PDF files up to 100 pages with average query response under 3 seconds.
- Integrated **PyPDF2** for text extraction and **FAISS vector indexing** for similarity search across 10,000+ text chunks, achieving 90%+ answer relevance in testing.
- Built conversational memory with multi-turn context tracking via Streamlit, enabling follow-up questions without losing session context.
- Tech:** Llama3, RAG, FAISS, PyPDF2, LangChain, HuggingFace, Streamlit, Python

Anime Recommendation System — NLP + Vector Search [\[GitHub\]](#)

- Developed a Flask web app using **Sentence Transformers (all-MiniLM-L6-v2)** and FAISS to deliver description-based anime recommendations, processing a corpus of 5,000+ titles.
- Implemented **MySQL** user preference storage and session tracking; reduced cold-start recommendations by 40% through profile-based filtering.
- Integrated external anime metadata API with secure key management and rate-limiting for production stability.
- Tech:** Flask, NLP, FAISS, Sentence Transformers, MySQL, REST API, Python

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript, HTML, CSS, Bash/Unix
AI / ML	Machine Learning, Deep Learning, NLP, Generative AI, Prompt Engineering, RAG Pipelines, Recommender Systems
Frameworks	LangChain, Flask, Django, Streamlit, Hugging Face, Sentence Transformers
Libraries	Pandas, NumPy, Scikit-learn, Keras, TensorFlow, PyTorch, Matplotlib, Seaborn, Plotly, FAISS
Tools	GitHub, VS Code, Jupyter Notebook, MySQL, Docker (basic)
Concepts	Vector Databases, Similarity Search, API Integration, MVC Architecture, REST APIs

EDUCATION

B.Tech in Artificial Intelligence & Data Science

Oct 2021 – Jun 2025

Guru Tegh Bahadur Institute of Technology (GGSIU), Delhi — **CGPA: 8.9 / 10**

Senior Secondary (Class XII) — Science (Non-Medical)

Jun 2019

Disha Delphi Global Sr. School, R.B.S.E. — **71.20%** | Subjects: Physics, Chemistry, Mathematics, English, Hindi

Secondary (Class X)

Jun 2017

MB International School, C.B.S.E. — **GPA: 8.8 / 10**

CERTIFICATION

Data Scientist Industrial Training & Internship Program

May – Aug 2023

DevTown — Hands-on training in ML algorithms, data analysis pipelines, and model deployment.
